

FEATURES

Endless Variety - 8 flavours on a barrel for unlimited combinations; single flavours, dual flavoured and swirled drinks

Customization - Create your beverage; Ability to combine and personalize flavors

Supply Chain Flexibility - Use neutral and flavored base to expand variety without risk of expired product and supply chain complexity

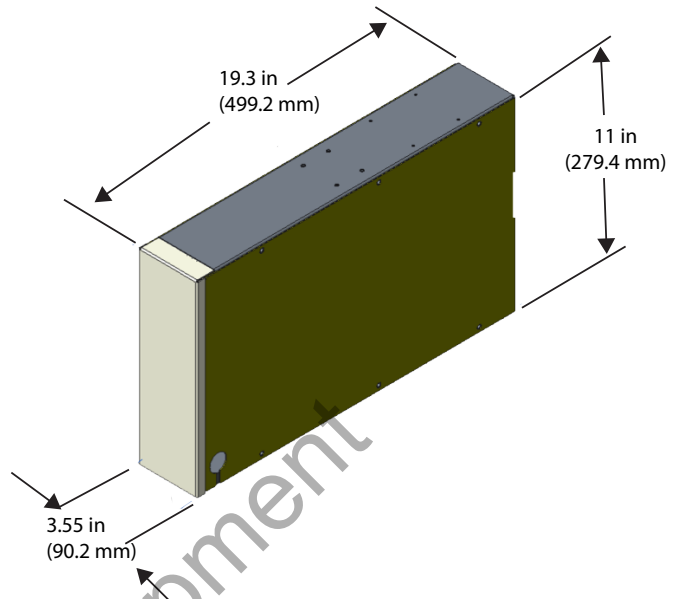

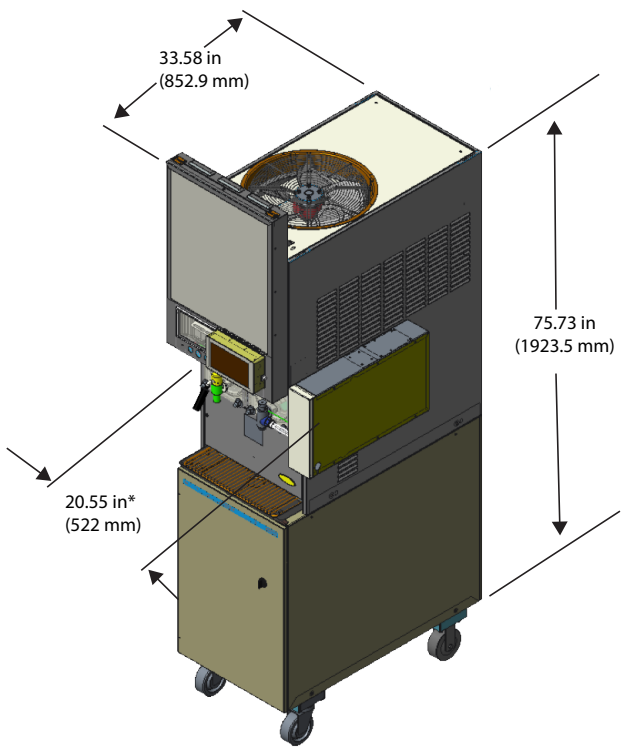

Pulsed Dispensing - Electronically controlled flavor dosing to maintain ratio during dual flavor dispensing.

Digital Interface - User friendly touch screen control for simple operation.

Retrofitable - FMFV kit designed to retrofit to your current FSB dispenser and Viper/Viper Elite built from 2012-present

Automation - Electrical actuation removes the need to touch the valves

Carryover Management System - Negligible flavor carryover between drinks
