Muffin Toaster

Equipment: Muffin Toaster Model #464-BC

Attention: Chemical sanitizer is used in the maintenance operation in this instruction. Follow established procedure in the store in the event of accidental physical contact with concentrated chemical sanitizer.

Tools Required

Oven glove

Buckets and cloth

McD's All Purpose Super Concentrate (APSC) solution

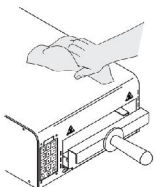

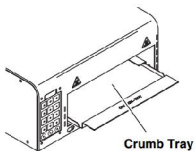

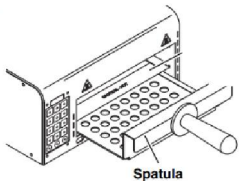

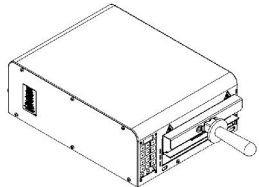

Clean: Daily PM Task

Turn off unit and unplug from the electrical outlet. Please be careful, the equipment is still very hot! Let muffin toaster cool for at least 30 minutes before cleaning..

This equipment is not waterproof, do not spray cleaning, not the equipment into the water. Do not use abrasive sponges or scouring pads of any type

1. Wait till unit cools sufficiently before cleaning
2. Wearing oven gloves, pull out the spatula and crumb tray.
3. Remove food residues from the spatula and crumb tray.
4. Soak the spatula and crumb tray into the water tank filled with diluted McD's All Purpose Super Concentrate (APSC) solution and let them sit in the sink for 15 minutes.
Make sure the spatula is cool sufficiently. Soaking a hot spatula into water can cause it to warp and affect toast quality
5. Wash, rinse, and sanitize spatula and crumb tray.
6. Rinse with clean water.
7. Let air dry.
8. Wipe the toaster with a clean, damp cloth.
